

# BEDROCKCOIN

(PROOF OF WORK)

WHITTEPAPER

○ ○ ○ THE FUTURE IS \$BRK

REVOLUTIONARY MINING

*WHAT IS BEDROCKCOIN?*

BedrockCoin (\$BRK) is a decentralized cryptocurrency that operates exclusively using the Proof of Work (PoW) mechanism. This approach ensures network security, chain immutability, and robust decentralization through the mining process.

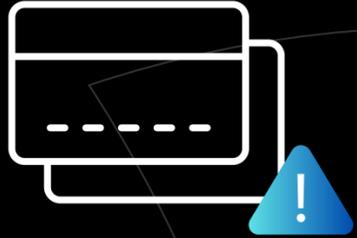

## WHAT IS THE TOTAL SUPPLY OF BEDROCKCOIN COINS?

The total supply of Bedrock (BRK) is limited to 7,460,000 coins. This fixed amount will be reached gradually over the years through the mining process.

## Why mine BedrockCoin?

**Simple and Accessible:** Mine easily from anywhere, using your cryptocurrencies with simple tools and without unnecessary complexities.

**Total Transparency (Blockchain):** Every transaction is verified by miners and all nodes on the network. Thanks to their contribution, the integrity and transparency of the blockchain are ensured.

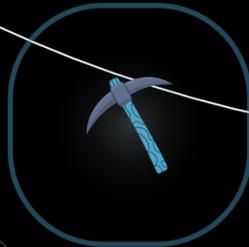

**High Profitability Potential:** Access a business model with an attractive profit margin that seeks to maximize your computing power (Hash).

## POW MINING?

Proof-of-Work (PoW) is based on competition and computing power. "Miners" compete to solve complex mathematical problems. The first to find the solution gets to add the next block to the chain and receives a reward in cryptocurrency. This requires a large amount of energy and specialized hardware (ASICs).

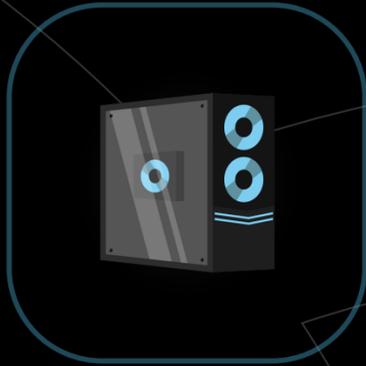

**Advantages:** It's a proven and very secure system against attacks. The Bitcoin network, for example, uses Proof-of-Work.

**Disadvantages:** High energy consumption is its main criticism, in addition to the centralization of mining in the hands of those who can afford the most powerful hardware.

*MINING OF BRK?*

PoW = **2 \$BRK**

New Block = 5 Minutes

Total = 7,460,000M - \$BRK

*WHAT IS THE AVERAGE TIME BETWEEN BLOCKS?*

The Bedrock Network is configured to maintain an average block time of 5 minutes. Mining difficulty is adjusted every 120 minutes to maintain this cadence, regardless of the number of active miners. This shorter block time allows for faster transactions and quicker synchronization.

## BEDROCKCOIN TRANSACTION SPEED?

Bedrock Coin (\$BRK) is an innovative cryptocurrency that combines the strengths of major networks like Bitcoin and Litecoin. It uses a Proof-of-Work (PoW) system with the Script algorithm, designed to offer fast and secure transactions.

This architecture allows Bedrock Coin transactions to be processed in seconds, emulating the speed of leading, efficient networks. Confirmation of each transaction is performed solely by Proof-of-Work (PoW) miners, ensuring a constant and dynamic flow that keeps the blockchain growing continuously.

Our goal is to create scarcity in the market and offer a reliable alternative for all types of investors. BedrockCoin not only seeks to revolutionize the market with its fair mining approach, but also promises a transparent investment environment with high growth potential.

# ROADMAP BEDROCKCOIN

## Long-term Growth:

This is a space for future goals, such as new partnerships, network expansions, or features that are not yet under development.

## Integration and Utility:

This path focuses on integrations with other platforms, demonstrating that BedrockCoin is more than just a currency; it is part of a broader ecosystem.

## Market Expansion:

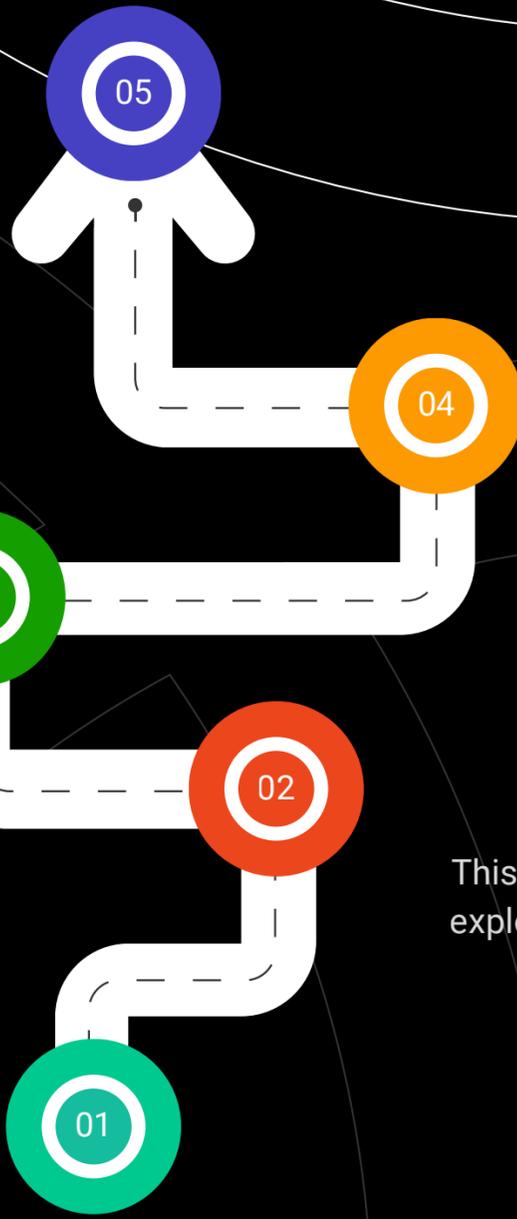

Listed on the Dex and Cex exchanges and also Swap.

## Launch and Foundation (Building the Foundation):

This is the beginning. This is where the success of your "Fair Launch" and the creation of the initial community and forum would take place.

## Tool Deployment:

This path is perfect for launching the block explorer. It's the first step toward providing transparency and usability.

## STATEMENT OF THE PROBLEM *BEDROCKCOIN*

The cryptocurrency ecosystem faces a critical challenge: **the centralization of mining power and the dependence on specialized hardware that excludes ordinary participants.**

BedrockCoin aims to solve this problem through a 100% Proof-of-Work (PoW) consensus system, designed to offer:

- **Unwavering security**
- **Real decentralization**
- **Universal accessibility**

Our network is built to ensure that every block is the result of verifiable work, without external mechanisms, without unfair advantages, and with a design that promotes equitable participation for all miners.

## TOKENOMICS AND DISTRIBUTION MECHANISM

The BedrockCoin (\$BRK) economy is designed with two fundamental principles:  
Absolute decentralization and fair distribution.

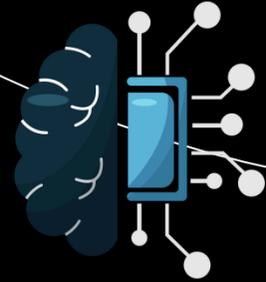

Unlike projects that start with pre-mining or privileged allocations, 100% of the \$BRK supply is generated solely through PoW mining, ensuring a level playing field for all participants.

- Total Supply: The total supply of BedrockCoin is strictly limited to **7,460,000 coins**.
- Fair Distribution: 100% of this supply will be distributed gradually through a Proof-of-Work (PoW) mining model. There was no pre-mining or prior allocation, ensuring a fair start for everyone.

## HYBRID ARCHITECTURE AND TECHNOLOGY

BedrockCoin (\$BRK) is a next-generation cryptocurrency based on a Proof-of-Work (PoW) consensus system, designed to offer security, efficiency, and accessibility globally.

- **Mining Algorithm:** Script BedrockCoin uses the Script algorithm for transaction validation and block generation. This algorithm promotes a more equitable distribution of mining power, enabling participation from a wide range of hardware and fostering a truly decentralized network..
- **Consensus for Work:** Each block on the BedrockCoin blockchain is the result of verifiable computational work. This approach ensures that the network remains secure, censorship-resistant, and free from central authorities. The integrity of the system is maintained through fair competition among independent miners.
- **Efficient and Scalable Design:** The network is optimized for consistent block time and rapid transaction propagation, ensuring a smooth experience for both users and miners. Difficulty parameters are dynamically adjusted to maintain stability, regardless of fluctuations in the global hashrate.

## LEGAL NOTICE AND RISK WARNING

This document, known as the BedrockCoin (\$BRK) white paper, is for informational purposes only and should not be construed as legal, financial, investment, or any other type of advice. The information contained herein is a description of the current state and future vision of the project.

**Risk Warning:** Investing in cryptocurrencies carries a high level of risk. The value of \$BRK can fluctuate significantly, and you could lose your entire investment. We urge you to conduct your own thorough research and not to invest more than you are prepared to lose.

**This is not a securities offering:** BedrockCoin is not a financial security or an investment contract. This document does not constitute an investment solicitation or an offer to buy or sell any cryptocurrency.

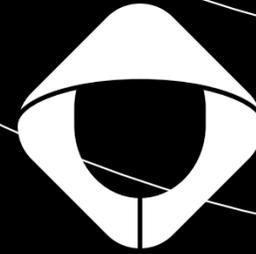

**Forward-Looking Statements:** Any statements regarding the future performance of BedrockCoin are based on estimates and assumptions that may not be accurate. Undue reliance should not be placed on these statements.

**Regulation:** Cryptocurrencies are subject to constantly changing regulations. Future regulations may impact the functionality or value of BedrockCoin.

## WHO CREATED BEDROCKCOIN?

### Manifesto of the Creator of BedrockCoin

Hi everyone, I'm passionate about cryptocurrencies. Ever since I first encountered Bitcoin when it was worth \$23, I've spent years navigating this world. Like many of you, I've fallen victim to investment scams, with cryptocurrencies disappearing and phantom wallets resetting, wiping out balances.

Tired of the mistrust, I dedicated years to studying programming languages and analyzing the behavior of different cryptocurrencies in proof-of-work (PoW) systems. My conclusion was clear: the solution lies in a 100% PoW network—simple, secure, and decentralized.

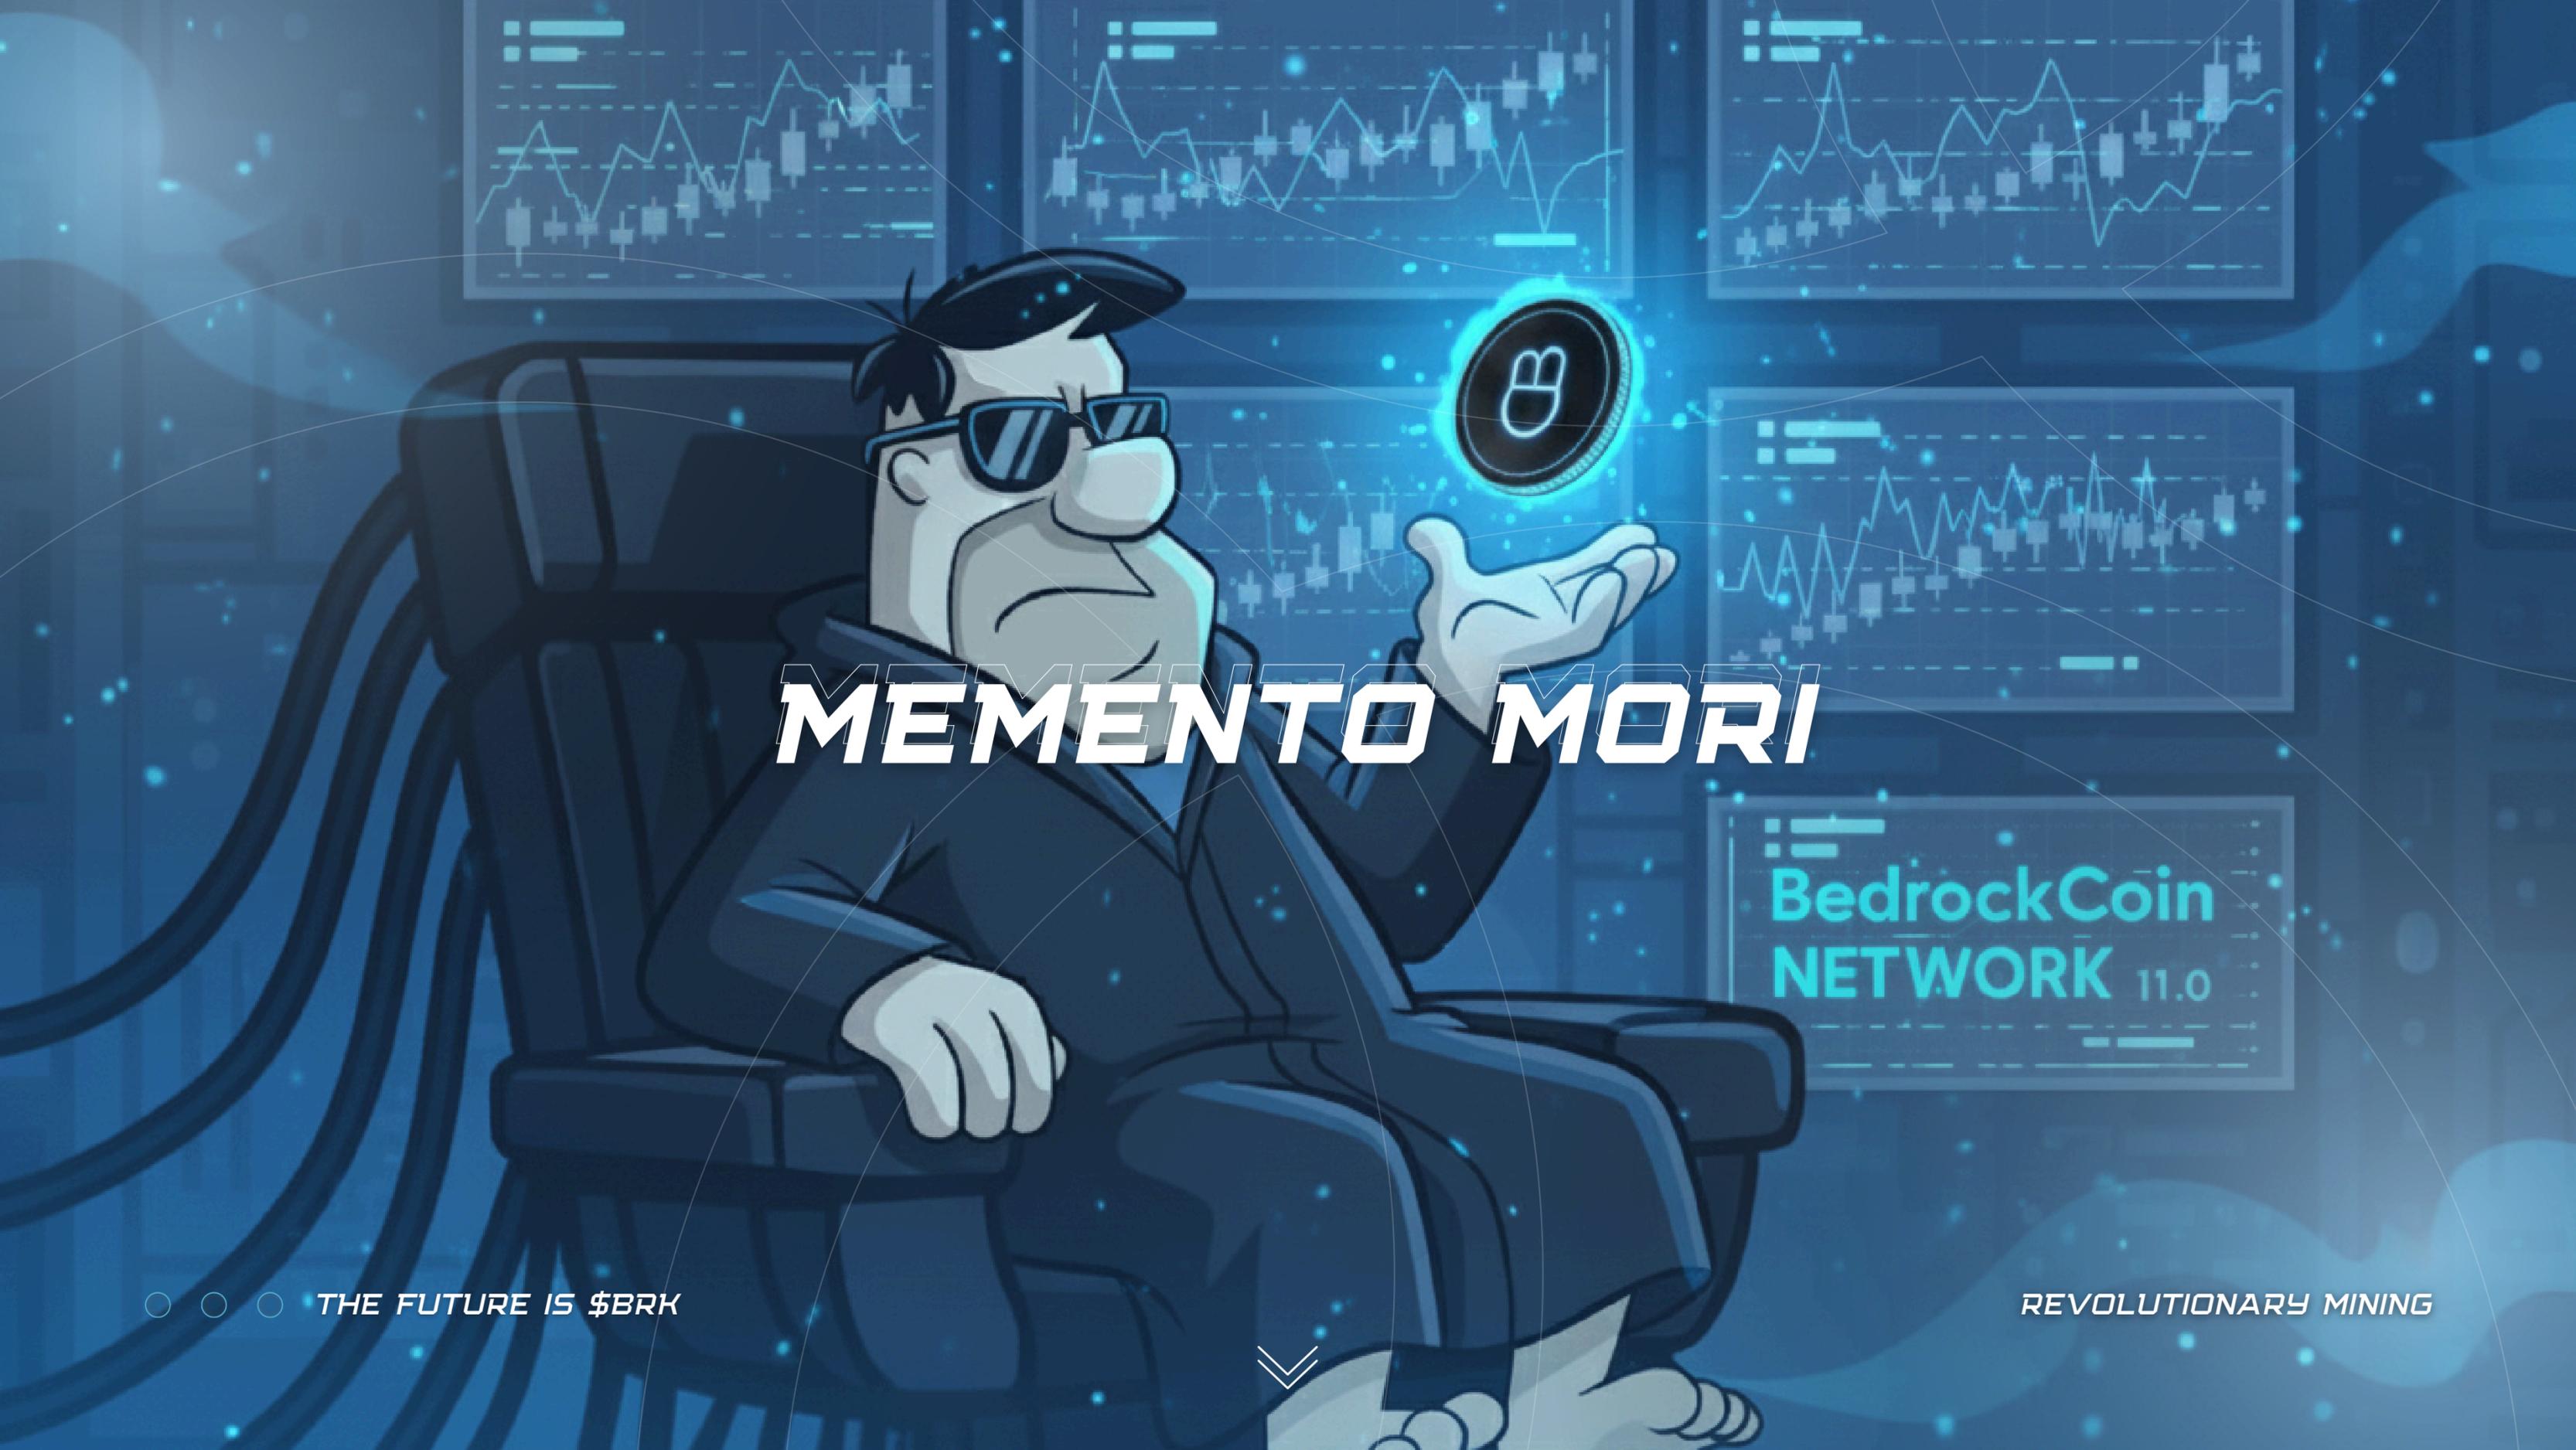

Thus was born BedrockCoin, a name that evokes solidity, resistance and unshakeable foundation.

I have decided to remain anonymous. This way, I prevent governments or large corporations from trying to centralize our currency, threaten us, or negotiate with me to gain control.

To the Bedrockers community, I say: use the currency, keep it, and don't burn it. We are all BedrockCoin.

And as always, remember: **Memento Mori.**
